

1922.

WESTERN AUSTRALIA.

Quarterly Statistical Abstract

(The preliminary figures published in this Abstract are, as far as possible, revised every quarter. Those which appear in this issue consequently supersede any contained in previous issues.)

No. 226.

To 30th June, 1922.

Compiled from Official Returns.

S. BENNETT, F.I.A.,
Government Statistician.

PERTH:

BY AUTHORITY: FRED. WM. SIMPSON, GOVERNMENT PRINTER.

1922.

*The exact amount, being Western Australian mintage, cannot be ascertained with any accuracy. †In the item "Uncoined Gold" is included gold contained in the form of Bar, Dust, Sheet, Ingot, or held in combination with other Metals, Ores, Furnace Products, Concentrates or other Matrix; this gold, prior to the first July, 1919, was valued at £4-24773 per ounce, and for each subsequent complete year at the average value of the fine ounce during each such year. For TOTAL PRODUCTION OF GOLD see Table No. 31, p. 23. ‡Exclusive of pearls. §The exports of the principal articles of mineral production may be taken as representing the bulk of the output. Coal, however, is at present principally used for local purposes. a Includes £320 Ships' Stores, for which no quantity is given. c. Average value of sovereign during the year £1-2884. d. Average value of fine ounce during the year £5-4727. e. Average value of sovereign during the year £1-3208. f. Average value of the fine ounce during the year £5-614. h. Not including premium.

No. 23.—Wool Exported from Western Australia.

Year ended 30th June, 1921.

XV.—METEOROLOGICAL STATISTICS.

No. 42.—Notes on the Rainfall of Western Australia for April, May, and June, 1922.

April.—Rainfall was extremely sparse during the earlier half of April, but two important rainstorms developed in the closing portion, and as a result the averages were surpassed over a large area of the State.

The first disturbance was of the inland type, and lasted from the 16th to 21st. The bulk of the rainfall occurred over the West Gascoyne, the Northern half of the Midland country, the extreme Eastern agricultural areas, and the Coolgardie Fields, but light showers extended to all sub-tropical areas, with the exception of parts of the South-West Coast and Great Southern districts. After a brief interval an inland depression again formed, and showers recommenced on the 26th. At the same time a disturbance approaching from the West reached the Leeuwin, bringing a heavy rain to South-West Coastal and Southern agricultural districts. A second and more vigorous system followed closely, and on the 29th a general fall was recorded throughout West and South-West Coastal areas, the agricultural districts, and a large part of the Coolgardie Fields. The closing day saw the rain contracting to the South Coast, where Esperance registered a downpour of 4·96 inches for the 24-hour period.

In the tropics a few isolated thundershowers fell, but defects were indicated at all stations except Turkey Creek. On the Murchison shortages also prevailed, but the West Gascoyne, Midland districts, and Metropolitan area, and most of the Coolgardie Goldfield localities showed more or less decided excesses, while along the South Coast the averages were greatly exceeded (5·40 inches above at Esperance). Results were variable through the Eastern and Southern agricultural districts, while at places in the South-West corner some fairly large defects were noted (Collie 1·27 inches below).

May.—The opening days of May were marked by the passage of slight disturbances, which brought showers to the South-West Coast and Southern agricultural districts, but apart from these fine weather prevailed until the 13th, when unsettled conditions developed in the North-West, and rapidly became general. Some heavy rainfalls occurred on the South-West Coast, but elsewhere they were chiefly light, and the greater part of the Gascoyne and Murchison was missed altogether. These districts were more fortunate on the 18th, when another general rain set in over sub-tropical areas. On the North Murchison gaugings up to 3 inches were reported.

Showers continued in Coastal and agricultural localities for nearly a week, and fine weather only returned for a day or two before the incoming of the last and heaviest rainstorm of the month. The rain commenced on the Coast in the early morning hours of Sunday, May 28th, and downpours ranging up to nearly 5 inches occurred during the ensuing 24 hours. In the agricultural districts the minimum gaugings which were effected in the far Eastern and North-Eastern portions were in the neighbourhood of three-quarters of an inch, while registrations of 2 to 2½ inches were noted at many Great Southern stations. Good rains, with many falls of an inch or over, also extended through the West Gascoyne and North-West, while lighter showers reached the Murchison and Coolgardie Fields.

Compared with the averages, the month's totals were very irregular. In the De Grey division excesses were general, while defects were the rule in the Midland districts and through the Coolgardie Goldfields. Elsewhere the results were too uneven to permit of generalisation. In Perth, for example, an excess of 1·81 inches was shown, while at Guildford the total fell short of the average by 2 inches.

June.—The month of June was characterised by an extremely scanty rainfall over the wheat-growing areas of the State. Only one rainstorm approached the ordinary winter type in extent and intensity, viz., that of the 6th to 8th inclusive, and even in this instance the gaugings dwindled away to a few points in the far Eastern districts. Disturbances affected the Coast on the 15th and 27th, but although the showers associated with the former lingered for several days, they reached the inland areas only in a very light and scattered fashion. The latter was due to a passing depression, and scarcely interrupted the spell of clear frosty weather that marked the close of the month.

The Gascoyne and Coolgardie Goldfields were affected by an off-shoot of the rainstorm of the 6th, and fairly substantial gaugings resulted in many districts. The average was exceeded at one or two Murchison stations, over a large portion of the North Coolgardie Fields, the Southern fringe of the South Coolgardie areas, and most of the South Coastal localities, also at Broome, which received the bulk of a tropical rain on the 13th. Throughout the North-West and West Gascoyne the defects were heavy, although not abnormal, but over West and South-West Coastal districts, and the whole of the Wheat Belt, the past June ranks amongst the driest ever experienced. Only five previous Junes during the 46 year period 1877-1922 showed totals as low, or lower, taking the State as a whole. These were in 1877, 1886, 1893, 1902, and 1912. In certain localities 1879, 1892, and 1914 were also marked by very dry Junes. On the whole the deficiencies for June of this year were not quite so pronounced as in the earlier instances, although a few scattered stations registered the lowest totals on record. Generally speaking, the totals for the month over Coastal areas represented about 50 per cent. of the average, while inland the proportion dwindled rapidly towards the Eastern fringes of the wheat-growing country, where several stations received only 20 per cent. of their normal June rainfall.

Ballot Papers Issued ...	48,436	36,707	85,143	Aggregate ...	39,875		38,242		

Result: Resolution A carried in 32 Licensing Districts by a total of 6,401 votes.
Resolution C in 10 Licensing Districts by a total of 4,768 votes.

On the two questions—(1) Whether new Publicans' General Licenses were to be held by the State, and (2) Whether State Management should obtain throughout districts, the voting resulted as follows:—(1) 23 districts voted "Yes" with an aggregate majority of 6,452 votes, 14 voted "No" with an aggregate majority of 675 votes; (2) 23 districts voted "Yes" with an aggregate majority of 5,110 votes, 19 voted "No" with an aggregate majority of 1,133.
